DIGITAL GROWTH PACKAGES

Your Digital Growth Partner for UAE Business

ATTRACT → LEAD GEN → GROW

DIGITAL GROWTH PARTNER

Your Business Needs More Than Visibility

Most businesses in the UAE don't need one more service provider running isolated campaigns. They need several things working together at once — and very few agencies are built to deliver that as one connected system.

- Being discovered on Google
- Reaching customers through social media
- Generating genuine enquiries

- Capturing visitor interest as leads
- Following up with leads effectively
- Maintaining a professional website

- Building organic search visibility
- Tracking marketing performance
- Automating repetitive processes

AMREN exists to bring these pieces together — as one connected digital growth system, not a collection of unrelated services.

OUR APPROACH

AMREN doesn't just run ads or create posts. We build digital systems that help businesses **attract** the right audience, turn that attention into **qualified leads**, and **grow** through sustainable, measurable digital infrastructure.

What we build our proposals around

Our objective is to build a measurable digital acquisition system designed to generate qualified enquiries and support sustainable business growth — combining paid advertising for immediate opportunities with websites, SEO, Local SEO, Google Business Profiles, social presence and tracking that compound in value over time. This reduces long-term dependence on paid advertising alone.

4-MONTH TOTAL

AED 13,500

Complete investment

Why is Month 1 AED 4,500?

Month 1 includes the one-time company website development, initial setup, tracking configuration and digital foundation work. From Month 2 onward, the website development component is complete, so the monthly service fee reduces to AED 3,000 while ongoing marketing, SEO and website management continue.

Company Profile Website

- ✓ Responsive, mobile-friendly, modern UI/UX
- ✓ Up to 5 core pages (e.g. Home, About, Services, Contact + 1 agreed page)
- ✓ Enquiry form & WhatsApp integration
- ✓ Lead-focused, SEO-friendly structure
- ✓ Analytics & Search Console setup, deployment
- ✓ Up to 2 reasonable revision rounds

Website Management (Month 2+)

- ✓ Basic maintenance & monitoring
- ✓ Minor content, text & image updates
- ✓ Marketing-related website updates
- ✓ Basic technical support

Website technology/platform (WordPress, Shopify, WooCommerce, custom development or other suitable platform) is selected based on the client's requirements and agreed scope. Major redesigns, new features, advanced functionality and e-commerce are quoted separately — see page 9.

BEST SUITED FOR

Established Businesses

Ready to invest in a complete digital foundation

Businesses Without a Website

Or replacing an outdated online presence

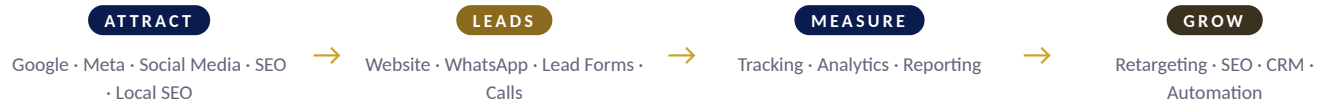

Long-Term Growth Partners

Building SEO & organic value over time

FROM REACH TO ENQUIRY

Turn Traffic Into Enquiries

Our goal is not simply to generate traffic. We aim to create a measurable journey from advertisement or search, to website or social profile, to enquiry, to potential customer.

Tracking & Lead Capture

- ✓ Google Analytics & Search Console
- ✓ Meta Pixel, where applicable
- ✓ Lead & enquiry tracking
- ✓ Website contact forms & WhatsApp integration
- ✓ Campaign tracking & performance reporting

Advanced CRM, automation, server-side tracking and custom dashboards are available as additional / custom services.

Building Organic Visibility (SEO)

- ✓ Keyword research & SEO strategy
- ✓ On-page SEO, meta titles & descriptions
- ✓ Basic technical SEO & indexing
- ✓ Google Search Console & monthly SEO reporting
- ✓ Local SEO: GBP optimization, local keyword targeting, business information consistency

SEO is a long-term strategy. Rankings, traffic and enquiries cannot be guaranteed and depend on competition, search demand, website authority, content and market conditions.

Why Google + Meta?

AMREN will primarily focus on Google Ads and Meta Ads, as these platforms can provide strong opportunities to reach users actively searching for products or services, and users who match the target audience on social platforms. Snapchat, TikTok, LinkedIn and other platforms can be evaluated based on industry, target audience, campaign objectives, location and expected performance.

Social Media Setup

- Facebook & Instagram Business setup / optimization
- Profile, bio & contact information optimization
- Basic branding setup & social media strategy

Ongoing Content & Management

- Distinct from initial setup — covered under each package's monthly content and campaign scope

THE PRINCIPLE

"Every stage of the system feeds the next. Attract without lead capture wastes a click. Leads without measurement waste the data. Growth without a system wastes the effort."
